
How to update your Windows device

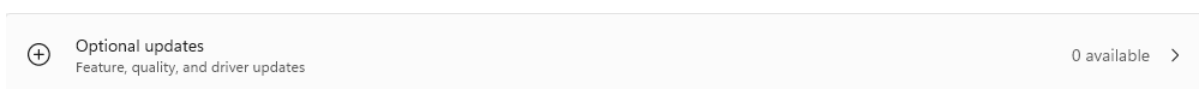

1. Select Start > Settings > Windows Update > [Select Check for Updates](#)

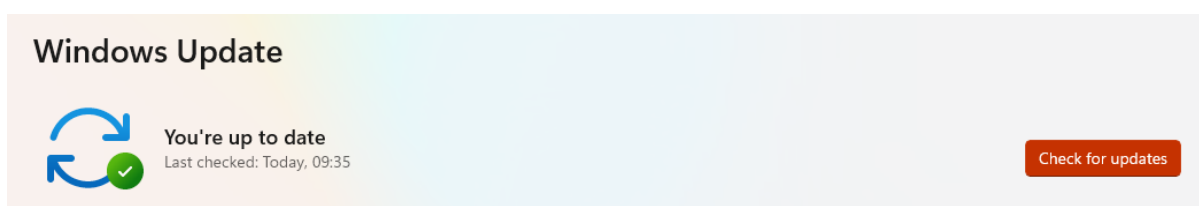

2. If any updates are available for you, select Download & install. Your device will download and install the updates. If prompted to do so, restart your device to apply the updates.
3. Click Advanced Options

4. Click Optional Updates

5. Download & install and optional updates.
6. Windows update will then show up to date

Check for Windows updates

Allow installation to complete without putting your Windows device to sleep or closing its lid. During installation, your machine might restart and show a progress % or blank screen several times.
