
How to set default save location to OneDrive

1. Firstly, open up Documents. Click on the blue locations link at the top or for windows 8 right click on Documents and select properties. Then in the dialogue box that opens click Add...

2. Next Click on the OneDrive Path and select Include Folder. Once you have added the folder right click and select set as default save location. You can then remove other paths in the Document library to stop saving in different file paths.
